Notes:

- Transfers between Sites require Multi-Site License

License Requirements:

**Role Assignment:**

- Inventory Control / Material Handlers

License Requirements:

**Role Assignment:**

- Inventory Control / Material Handlers

Notes:

- Site requiring material creates the Transfer and specifies what Site they want the material to come from

License Requirements:

**Role Assignment:**

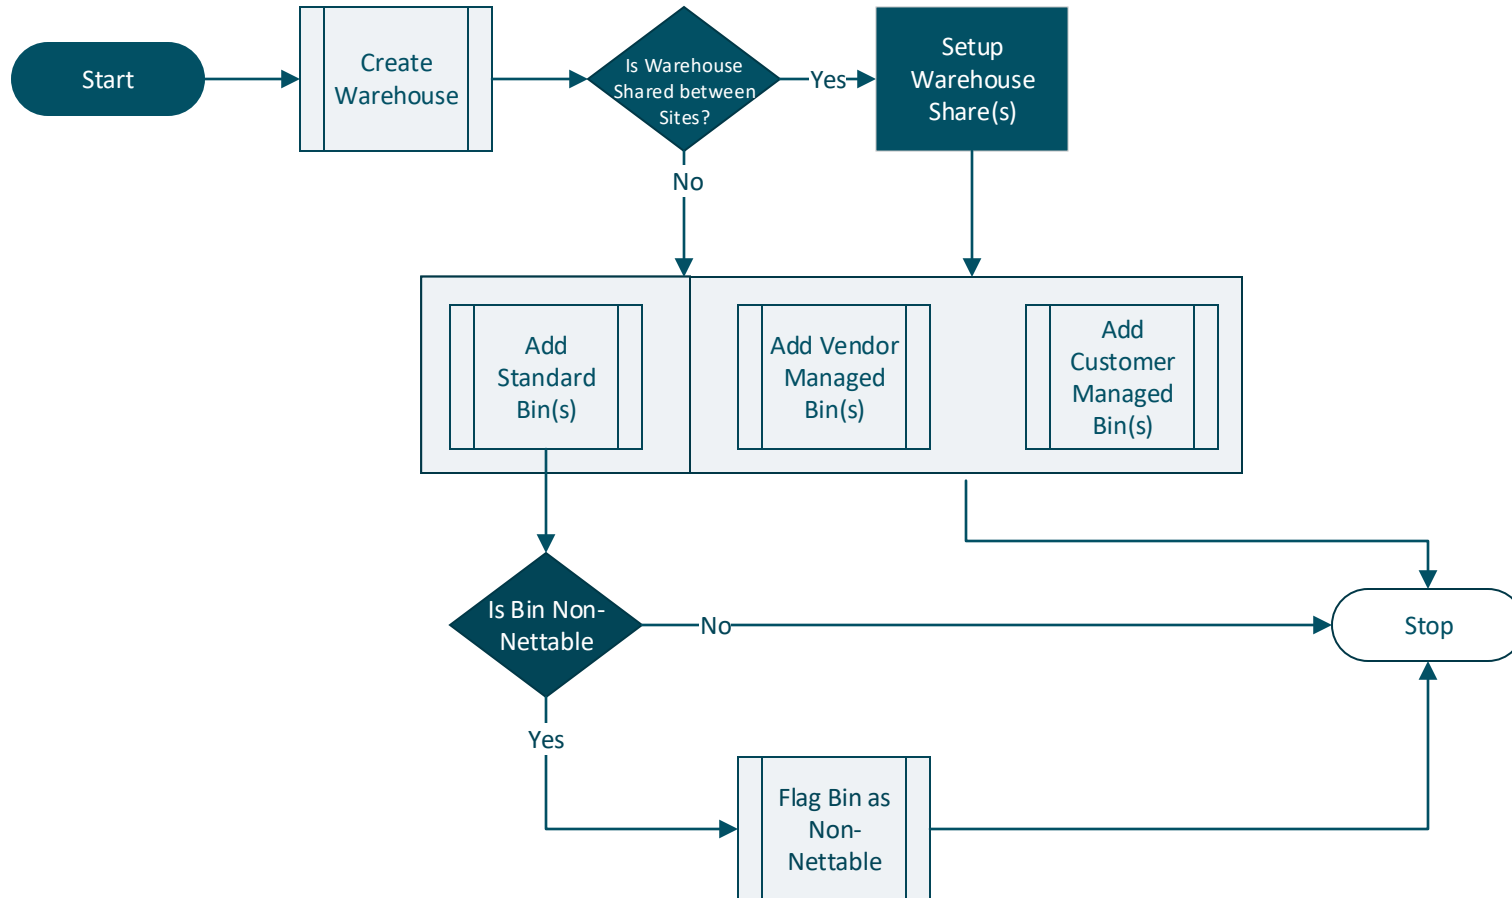

- Inventory Control / Material Handlers

Notes:

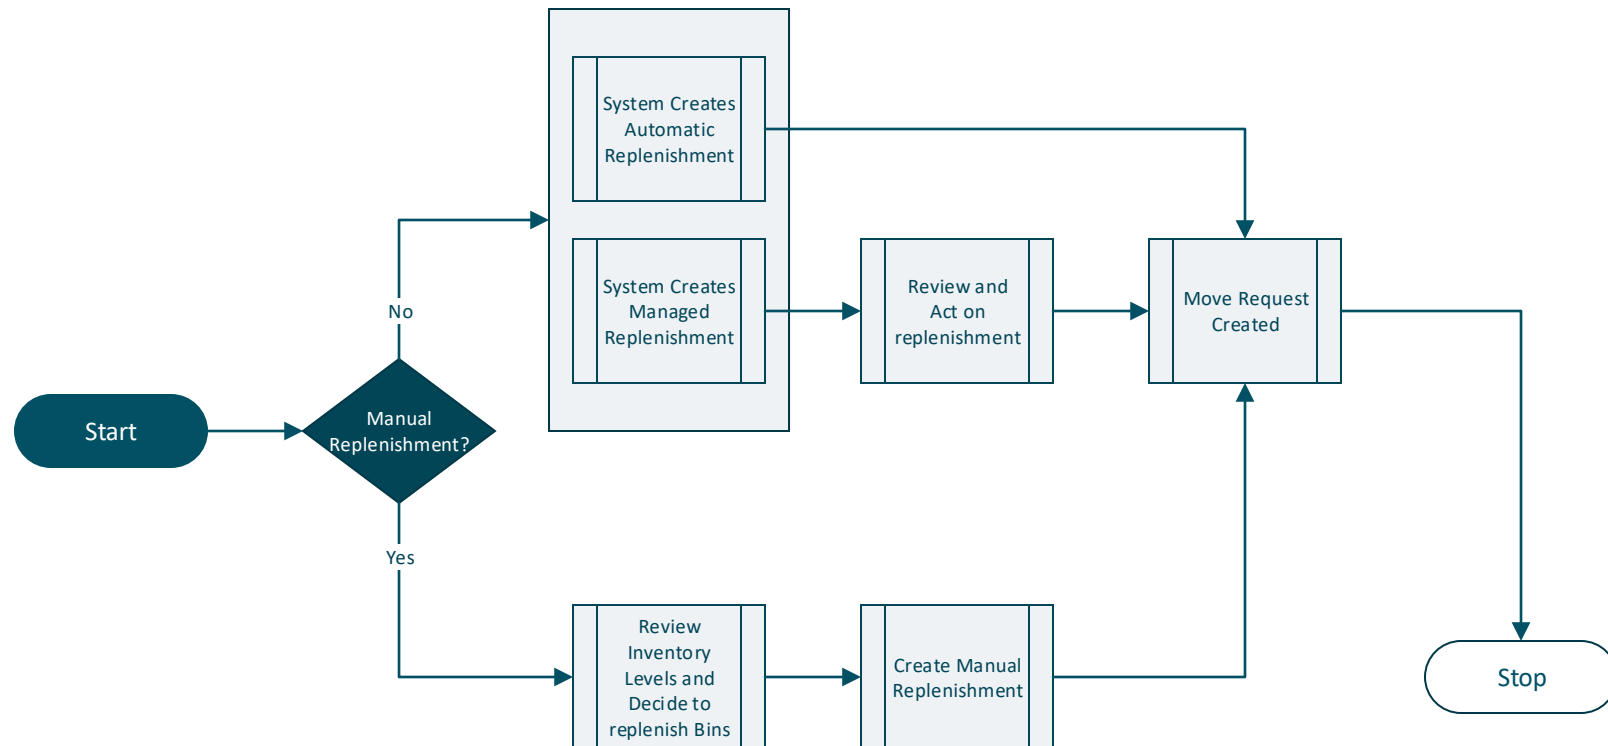

- Site requiring material creates the Transfer and specifies what Site they want the material to come from

License Requirements:

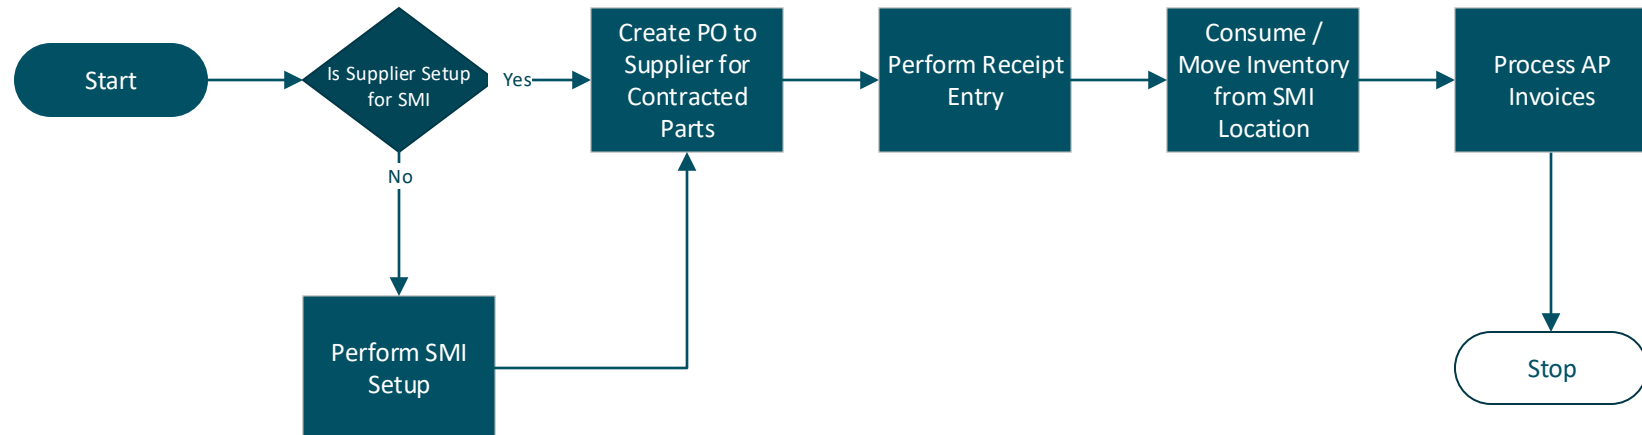

**Role Assignment:**

- Inventory Control

Notes:

- System generates replenishment requests when inventory availability goes below Minimum values

License Requirements:

**Role Assignment:**

- Inventory Control

Notes:

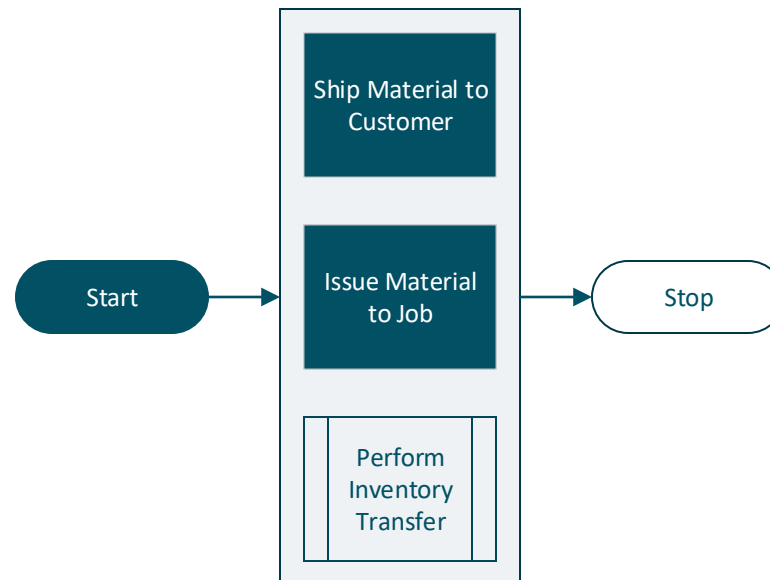

- The AP processes are delayed until the stock is consumed or moved out of the Supplier Managed Bin

License Requirements:

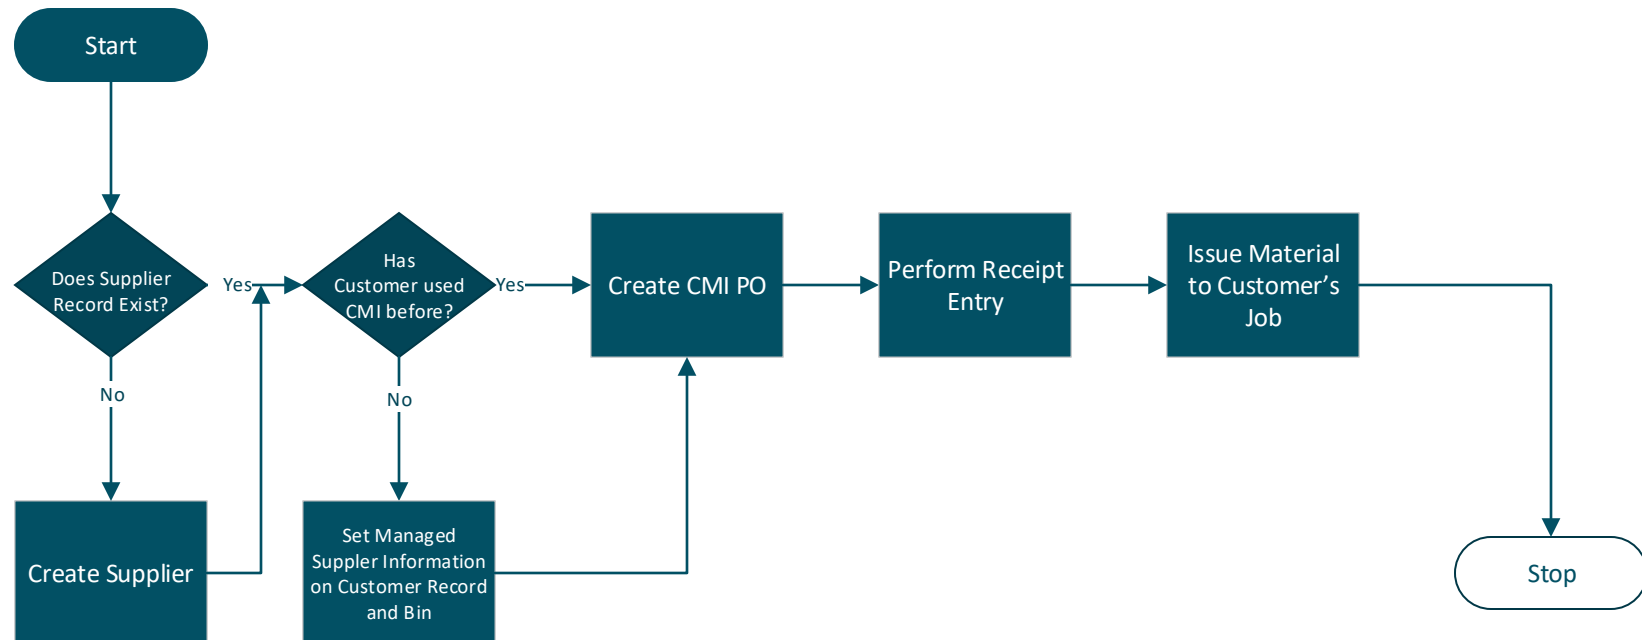

**Role Assignment:**

- Inventory Control

Note:

- Supplier Invoices will not show for matching or show on the Received Not Invoiced Report until the inventory is transferred out of the SMI Bin

License Requirements:

**Role Assignment:**

- Inventory Control

Notes:

- Customer Managed Inventory will not create an AP clearing Process. There will not be an AP invoice for this material

License Requirements:

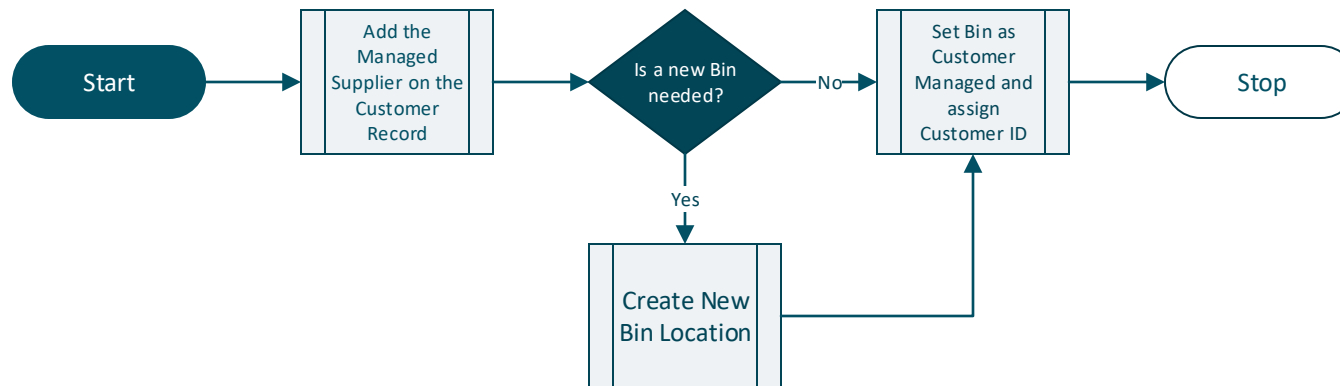

**Role Assignment:**

- Accounts Payable / Sales

Notes:

- Suppliers are not flagged for Customer Managed Inventory in Supplier Setup. This will be done on the Customer Record and when creating the PO
